Section 5. Fire-fighting measures

Specific hazards of the hazardous product (hazardous combustion products)

Carbon oxides and other irritant/toxic gases and fumes.

Suitable and unsuitable extinguishing media

In case of fire: Use carbon dioxide, chemical powder agent and appropriate foam to extinguish.

Special protective equipment and precautions for fire-fighters

During a fire, irritating/toxic smoke and fumes may be generated. Do not enter fire area without proper protection. Firefighters should wear proper protective equipment and self-contained breathing apparatus with full facepiece. Shield personnel to protect from venting, rupturing or bursting cans. Move containers from fire area if it can be done without risk. Water spray may be useful in cooling equipment and cans exposed to heat and flame.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

Restrict access to area until completion of clean-up. Ensure clean-up is conducted by trained personnel only. All persons dealing with clean-up should wear the appropriate protective equipment (See Section 8).

Methods and materials for containment and cleaning up

Avoid release to the environment. Collect spillage. Ventilate area of release. Stop the leak if it can be done safely. Contain and absorb any spilled liquid concentrate with inert absorbent material, then place material into a container for later disposal (see Section 13). Contaminated absorbent material may pose the same hazards as the spilled product. Notify the appropriate authorities as required.

Section 7. Handling and storage

Precautions for safe handling

Protect from sunlight. Do not expose to temperatures exceeding 50 °C/122 °F. Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Do not spray on an open flame or other ignition source. Do not pierce or burn, even after use. Use only outdoors or in a well-ventilated area. Wash hands/nails/face thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace. Wear gloves/protective clothing/eye protection/face protection.

Before handling, it is very important that engineering controls are operating, and that protective equipment requirements and personal hygiene measures are being followed. People working with this chemical should be properly trained regarding its hazards and its safe use. Inspect containers for leaks before handling. Label containers appropriately. Ensure proper ventilation. Avoid breathing dust/fume/gas/mist/vapours/spray. Avoid contact with eyes, skin and clothing. Keep away from heat, sparks and flame. Avoid generating high concentrations of dusts, vapours or mists. Keep away from incompatible materials (Section 10). Keep containers closed when not in use. Empty containers are always dangerous. Refer also to Section 8.

Conditions for safe storage, including any incompatibilities

Store in a well-ventilated place. Keep container tightly closed. Keep cool. Store locked up. Store away from incompatible materials (Section 10). Inspect all incoming containers to make sure they are properly labelled and not damaged. Storage area should be clearly identified, clear of obstruction and accessible only to trained personnel. Inspect periodically for damage or leaks.

Section 8. Exposure controls/Personal protection

Control parameters (biological limit values or exposure limit values and source of those values)

Exposure limits: CAS 74-98-6 & 75-28-5 – ACGIH – TLV-TWA (STEL) and/or PEL-TWA 1000 ppm; CAS 142-82-5 – ACGIH – TLV-TWA 400 ppm & TLV-STEL 500 ppm & PEL-TWA 500 ppm;

Appropriate engineering controls

Use under well-ventilated conditions. Local exhaust ventilation system is recommended to maintain concentrations of contaminants below exposure limits. Make emergency eyewash stations, safety/quick-drench showers, and washing facilities available in work area.

Individual protection measures/personal protective equipment

Respiratory protection is required if the concentrations are higher than the exposure limits. Use a NIOSH approved respirators if the exposure limits are unknown. Chemically protective gloves (impervious), and other protective clothing to prevent prolonged or repeated skin contact, must be worn during all handling operations. Wear protective chemical splash goggles to prevent mists from entering the eyes. Wash hands/nails/face thoroughly after handling. Do not eat, drink or smoke when using this product. Practice good personal hygiene after using this material. Remove and wash contaminated work clothing before re-use.

Section 9. Physical and chemical properties					
Appearance, physical state/colour Yellow liquid (aerosol)	Vapour pressure Not available				
Odour Characteristic	Vapour density Heavier than air				
Odour threshold Not available	Relative density 0.64-0.69				
pH Not available	Solubility Not available				
Melting/freezing point Not available	Partition coefficient - n-octanol/water Not available				
Initial boiling point/range 92°C	Auto-ignition temperature Not available				
Flash point~ 13°C Closed cup (flame projection > 15 cm & flashback	~ 13°C Closed cup (flame projection > 15 cm & flashback Decomposition temperature Not available				
present)					
Evaporation rate Not available	Viscosity $< 14 \text{ cSt} @ 40^{\circ}\text{C}$				
Flammability (solids and gases) Extremely flammable aerosol	VOC Not available				
Upper and lower flammability/explosive limits	Other None known				

Section 10. Stability and reactivity

	Section 10. Stability and reactivity			
Reactivity				
Does not react under the recommended storage a	and handling conditions prescribed.			
Chemical stability				
Stable under the recommended storage and hand	lling conditions prescribed.			
Possibility of hazardous reactions				
Accumulation of flammable if product is heat	ed. Do not spray on an open flame or other ignition source. Do not pierce or burn, even after use.			
Protect from sunlight. Do not expose to temper	atures exceeding 50 °C/122 °F.			
Conditions to avoid (static discharge, shock				
	en flames and other ignition sources. No smoking. Do not spray on an open flame or other ignition			
	rotect from sunlight. Do not expose to temperatures exceeding 50 °C/122 °F.			
Incompatible materials				
Oxidizing materials; etc.				
Hazardous decomposition products				
None known				
	Section 11. Toxicological information			
Information on the likely routes of exposure	(inhalation, ingestion, skin and eye contact)			
May be fatal if swallowed and enters airways.	Causes skin irritation. Causes serious eye irritation. May cause drowsiness or dizziness. May displace			
oxygen and cause rapid suffocation.				
Symptoms related to the physical, chemical	and toxicological characteristics			
Skin irritation, redness, stinging, pain; Eye i	rritation, redness, tearing; Respiratory tract irritation, coughing, shortness of breath, dizziness,			
drowsiness, nausea and headaches.				
Delayed and immediate effects (chronic effect	cts from short-term and long-term exposure)			
Skin Sensitization – No data available;				
Respiratory Sensitization – No data available;				
Germ Cell Mutagenicity – No data available;				
Carcinogenicity - No ingredient listed by IARC	C, ACGIH, NTP or OSHA;			
Reproductive Toxicity – No data available;				
Specific Target Organ Toxicity — Single Exposure – Central nervous system;				
Specific Target Organ Toxicity — Repeated Ex	xposure – No data available;			
Aspiration Hazard – Possible;				
Health Hazards Not Otherwise Classified - No				
Numerical measures of toxicity (ATE; LD50				
CAS 75-28-5 LC ₅₀ 658000 mg/m ³ 4 hrs (rat); C	CAS 142-82-5 LC ₅₀ - Rat – 48000 ppm 4hrs;			
ATE not available in this document.				
	Section 12. Ecological information			
Ecotoxicity (aquatic and terrestrial informat				
Persistence and degradability No data available for this product.				
	able for this product.			
Mobility in soil No data available for this	product.			
Other adverse effects No data available				
Section 13. Disposal considerations				
Information on safe handling for disposal/methods of disposal/contaminated packaging				
Dispose of contents/container into safe container in accordance with local, regional or national regulations.				
Section 14. Transport information				
UN number; Proper shipping name; Class(es); Packing group (PG) of the TDG Regulations				
UN1950; AEROSOLS; CLASS 2.1				
	s); Packing group (PG) of the IMDG (maritime)			
UN1950; AEROSOLS; CLASS 2.1				
UN number; Proper shipping name; Class(es); Packing group (PG) of the IATA (air)				
UN1950; AEROSOLS, FLAMMABLE; CLAS				
Special precautions	May also be shipped as a LIMITED QUANTITY in accordance with TDG.			
(transport/conveyance)				
Environmental hazards (IMDG or other)	None			
Bulk transport (usually more than 450 L in capacity) Not possible				
• • •				

		Section 15. Regulatory information			
Safety/health C	Canadian regulations specifics	Refer to Section 2 for the appropriate classification. This product has been classified in accordance			
-		with the hazard criteria of the Hazardous Products Regulations (HPR).			
Environmental	l Canadian regulations specifics	Refer to Section 3 for ingredient(s) of the DSL			
	environmental outside regulation				
United States O	SHA information: This product is	s regulated according to OSHA (29 CFR).			
United States E	PA (Environmental Protection Ag	ency) information: 40 CFR Refer to the ingredients listed in Section 3 & Sections 12; 13 & 14.			
	CSA information: Refer to the ing	gredients listed in Section 3.			
National Fire Pr	rotection Association (NFPA):				
HEALTH: 1		TABILITY: 1 SPECIAL HAZARDS: Refer to Section 2 & 3.			
		2 = Moderate $3 = Serious$ $4 = Severe$			
California Propo	osition 65: This product may contai	in traces of a material known to the State of California to cause cancer or other reproductive harm.			
		Section 16. Other information			
	Date of the latest revision of the safety data sheetMay 23, 2018 version 1 (NSS ENTREPRISE INC.)
