**RE: EXEMPT – Healthcare Products**

**Product Trade Name: 3M Avagard Foam**

**ID #s:** CH-0000-1615-4, CH-0000-1616-2, CH-0000-1617-0

To Whom it May Concern,

Products regulated under the Food and Drug Act (F&DA) of Canada (drugs, natural health product, medical device, cosmetic or vet product) are referenced in Part II, Section 12 (b) of the Hazardous Products Act (HPA) and are therefore exempt from the requirement to provide a MSDS under Workplace Hazardous Materials Information System (WHMIS). The products mentioned above are regulated under the F&DA, and therefore do not require Canadian MSDSs.

3M may create medical and dental MSDSs for Business reasons or to meet other global requirements. If a US version of the product MSDS is available on-line it will be the most up to date document, will contain all the same information a Canadian version would and can be referenced for your documentation.

We anticipate this information will be satisfactory.

Thank you for your inquiry and your interest in 3M products.

Best regards,

Regulatory Group  
3M Canada Company
