SECTION 2. HAZARDS IDENTIFICATION

GHS Classification

Based on available data this substance / mixture does not meet the classification criteria.

GHS label elements

16	800001028727		
Precautionary statements	 Prevention: No precautionary phrases. Response: No precautionary phrases. 		
Hazard statements	 PHYSICAL HAZARDS: Not classified as a physical hazard under GHS criteria. HEALTH HAZARDS: Not classified as a health hazard under GHS criteria. ENVIRONMENTAL HAZARDS: Not classified as an environmental hazard under GHS criteria. 		
Signal word	: No signal word		
Hazard pictograms	No Hazard Symbol required		

VersionRevision Date:SDS Number:Prin1.102023-11-21800001028727Date

Print Date: 2023-11-22 Date of last issue: 08.04.2021 Date of first issue: 26.10.2010

Storage:

No precautionary phrases. **Disposal:** No precautionary phrases.

Other hazards which do not result in classification

Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis. Used oil may contain harmful impurities. Not classified as flammable but will burn.

SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

Substance / Mixture	: Mixture
Substance name	: Pennzoil Platinum SAE 0W-20 Full Synthetic Motor Oil
Chemical nature	 Synthetic base oil and additives. Highly refined mineral oil. The highly refined mineral oil contains <3% (w/w) DMSO-extract, according to IP346. The highly refined mineral oil is only present as additive diluent. Classification based on DMSO extract content < 3% (Regulation (EC) 1272/2008, Annex VI, Part 3, Note L). * contains one or more of the following CAS-numbers: 64742-53-6, 64742-54-7, 64742-55-8, 64742-56-9, 64742-65-0, 68037-01-4, 72623-86-0, 72623-87-1, 8042-47-5, 848301-69-9, 68649-12-7, 151006-60-9, 163149-28-8, 64741-88-4, 64741-89-5.

Hazardous components

Chemical name	CAS-No.	Concentration (% w/w)
Interchangeable low viscosity base oil (<20,5 cSt @40°C) *	Not Assigned	0 - 90 -
Alkaryl amine	36878-20-3	1-3 -
Alkylphenol	27193-86-8	< 0.24
Long chain furan	28777-98-2	< 0.9

SECTION 4. FIRST-AID MEASURES

If inhaled

: No treatment necessary under normal conditions of use. If symptoms persist, obtain medical advice.

Version 1.10	Revision Date: 2023-11-21	SDS Number: 800001028727	Print Date: 2023-11-22 Date of last issue: 08.04.2021 Date of first issue: 26.10.2010
In cas	e of skin contact	ter and follow	aminated clothing. Flush exposed area with wa- by washing with soap if available. ritation occurs, obtain medical attention.
In cas	e of eye contact	Remove conta rinsing.	n copious quantities of water. act lenses, if present and easy to do. Continue ritation occurs, obtain medical attention.
lf swa	llowed		treatment is necessary unless large quantities d, however, get medical advice.
	important symptoms ffects, both acute and ed	of black pustu	ulitis signs and symptoms may include formation les and spots on the skin of exposed areas. result in nausea, vomiting and/or diarrhoea.
Protec	ction of first-aiders	appropriate pe	stering first aid, ensure that you are wearing the ersonal protective equipment according to the y and surroundings.
Notes	to physician	: Treat symptor	natically.

SECTION 5. FIRE-FIGHTING MEASURES

Suitable extinguishing media	:	Foam, water spray or fog. Dry chemical powder, carbon diox- ide, sand or earth may be used for small fires only.
Unsuitable extinguishing media	:	Do not use water in a jet.
Specific hazards during fire- fighting	:	Hazardous combustion products may include: A complex mixture of airborne solid and liquid particulates and gases (smoke). Carbon monoxide may be evolved if incomplete combustion occurs. Unidentified organic and inorganic compounds.
Specific extinguishing meth- ods	:	Use extinguishing measures that are appropriate to local cir- cumstances and the surrounding environment.
Special protective equipment for firefighters	:	Proper protective equipment including chemical resistant gloves are to be worn; chemical resistant suit is indicated if large contact with spilled product is expected. Self-Contained Breathing Apparatus must be worn when approaching a fire in a confined space. Select fire fighter's clothing approved to relevant Standards (e.g. Europe: EN469).

SECTION 6. ACCIDENTAL RELEASE MEASURES

Version 1.10	Revision Date: 2023-11-21	SDS Numbe 800001028	
tive ec	nal precautions, protec- luipment and emer- procedures	: Avoid co	ontact with skin and eyes.
Enviro	nmental precautions	nation. F	ropriate containment to avoid environmental contami- Prevent from spreading or entering drains, ditches or using sand, earth, or other appropriate barriers.
			thorities should be advised if significant spillages be contained.
	ds and materials for nment and cleaning up	Prevent or other Reclaim Soak up	when spilt. Avoid accidents, clean up immediately. from spreading by making a barrier with sand, earth containment material. liquid directly or in an absorbent. residue with an absorbent such as clay, sand or other material and dispose of properly.
Additic	onal advice	see Sec For guid	ance on selection of personal protective equipment tion 8 of this Safety Data Sheet. ance on disposal of spilled material see Section 13 of ety Data Sheet.

SECTION 7. HANDLING AND STORAGE

General Precautions	: Use local exhaust ventilation if there is risk of inhalation of vapours, mists or aerosols. Use the information in this data sheet as input to a risk assessment of local circumstances to help determine appropriate controls for safe handling, storage and disposal of this material.
Advice on safe handling	: Avoid prolonged or repeated contact with skin. Avoid inhaling vapour and/or mists. When handling product in drums, safety footwear should be worn and proper handling equipment should be used. Properly dispose of any contaminated rags or cleaning mate- rials in order to prevent fires.
Avoidance of contact	: Strong oxidising agents.
Product Transfer	: Proper grounding and bonding procedures should be used during all bulk transfer operations to avoid static accumulation
Storage	
Other data	 Keep container tightly closed and in a cool, well-ventilated place. Use properly labeled and closable containers.

Version 1.10	Revision Date: 2023-11-21	SDS Number: 800001028727	Print Date: 2023-11-22 Date of last issue: 08.04.2021 Date of first issue: 26.10.2010	
		Store at ambien	t temperature.	
Packaging material			I: For containers or container linings, use mild nsity polyethylene. erial: PVC.	
Container Advice			Polyethylene containers should not be exposed to high tem- peratures because of possible risk of distortion.	

SECTION 8. EXPOSURE CONTROLS AND PERSONAL PROTECTION

Components with workplace control parameters

Components	CAS-No.	Value type	Control parame-	Basis
		(Form of	ters / Permissible	
		exposure)	concentration	
Oil mist, mineral	Not Assigned	TWA (Mist)	5 mg/m3	OSHA Z-1
		TWA (Inhal-	5 mg/m3	ACGIH
		able particu-	-	
		late matter)		

Biological occupational exposure limits

No biological limit allocated.

Monitoring Methods

Monitoring of the concentration of substances in the breathing zone of workers or in the general workplace may be required to confirm compliance with an OEL and adequacy of exposure controls. For some substances biological monitoring may also be appropriate.

Validated exposure measurement methods should be applied by a competent person and samples analysed by an accredited laboratory.

Examples of sources of recommended exposure measurement methods are given below or contact the supplier. Further national methods may be available.

National Institute of Occupational Safety and Health (NIOSH), USA: Manual of Analytical Methods http://www.cdc.gov/niosh/

Occupational Safety and Health Administration (OSHA), USA: Sampling and Analytical Methods http://www.osha.gov/

Health and Safety Executive (HSE), UK: Methods for the Determination of Hazardous Substances http://www.hse.gov.uk/

Institut für Arbeitsschutz Deutschen Gesetzlichen Unfallversicherung (IFA), Germany http://www.dguv.de/inhalt/index.jsp

L'Institut National de Recherche et de Securité, (INRS), France http://www.inrs.fr/accueil

Engineering measures	The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances.
	Appropriate measures include:
	Adequate ventilation to control airborne concentrations.

Version 1.10	Revision Date: 2023-11-21	SDS Number: 800001028727	Print Date: 2023-11-22 Date of last issue: 08.04.2021 Date of first issue: 26.10.2010

	protection narks	gloves approve US: F739) mad suitable chemic gloves Suitabilit usage, e.g. frec sistance of glov	ntact with the product may occur the use of d to relevant standards (e.g. Europe: EN374, e from the following materials may provide al protection. PVC, neoprene or nitrile rubber cy and durability of a glove is dependent on uency and duration of contact, chemical re- e material, dexterity. Always seek advice from Contaminated gloves should be replaced.	

Version 1.10	Revision Date: 2023-11-21	SDS Number: 800001028727	Print Date: 2023-11-22 Date of last issue: 08.04.2021 Date of first issue: 26.10.2010		
		Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Appli- cation of a non-perfumed moisturizer is recommended. For continuous contact we recommend gloves with break- through time of more than 240 minutes with preference for > 480 minutes where suitable gloves can be identified. For short-term/splash protection we recommend the same but recognize that suitable gloves offering this level of protection may not be available and in this case a lower breakthrough time maybe acceptable so long as appropriate maintenance and replacement regimes are followed. Glove thickness is not a good predictor of glove resistance to a chemical as it is dependent on the exact composition of the glove material. Glove thickness should be typically greater than 0.35 mm depending on the glove make and model.			
Eye protection			handled such that it could be splashed into eyes, ewear is recommended.		
Skin and body protection		work clothes.	on is not ordinarily required beyond standard ctice to wear chemical resistant gloves.		
Thermal hazards		: Not applicabl	e		
Protective measures			tective equipment (PPE) should meet recom- onal standards. Check with PPE suppliers.		

Environmental exposure controls

General advice	 Take appropriate measures to fulfill the requirements of relevant environmental protection legislation. Avoid contamination of the environment by following advice given in Section 6. If necessary, prevent undissolved material from being discharged to waste water. Waste water should be treated in a municipal or industrial waste water treatment plant before discharge to surface water. Local guidelines on emission limits for volatile substances must be observed for the discharge of exhaust air containing vapour.

SECTION 10. STABILITY AND REACTIVITY

Reactivity	: The product does not pose any further reactivity hazards in addition to those listed in the following sub-paragraph.
Chemical stability	: Stable.
Possibility of hazardous reac- tions	: Reacts with strong oxidising agents.
Conditions to avoid	: Extremes of temperature and direct sunlight.
Incompatible materials	: Strong oxidising agents.
Hazardous decomposition products	: No decomposition if stored and applied as directed.

SECTION 11. TOXICOLOGICAL INFORMATION

Basis for assessment	:	Information given is based on data on the components and the toxicology of similar products.Unless indicated otherwise,
		the data presented is representative of the product as a whole, rather than for individual component(s).

Information on likely routes of exposure

Skin and eye contact are the primary routes of exposure although exposure may occur following accidental ingestion.

Acute toxicity

Product:

Acute oral toxicity	:	LD50 (rat): > 5,000 mg/kg
		Remarks: Low toxicity

Version 1.10	Revision Date: 2023-11-21	SDS Number: 800001028727	Print Date: 2023-11-22 Date of last issue: 08.04.2021 Date of first issue: 26.10.2010		
		Based on availa	ble data, the classification criteria are not met.		
Acute inhalation toxicity		: Remarks: Based are not met.	d on available data, the classification criteria		
Acute dermal toxicity		Remarks: Low t	 LD50 (Rabbit): > 5,000 mg/kg Remarks: Low toxicity Based on available data, the classification criteria are not met. 		

Skin corrosion/irritation

Product:

Remarks: Slightly irritating to skin. Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis. Based on available data, the classification criteria are not met.

Serious eye damage/eye irritation

Product:

Remarks: Slightly irritating to the eye. Based on available data, the classification criteria are not met.

Respiratory or skin sensitisation

Product:

Remarks: Not a skin sensitiser. Based on available data, the classification criteria are not met.

Germ cell mutagenicity

Product:

Genotoxicity in vivo	:	Remarks: Non mutagenic	
		Based on available data, the classification criteria are not met.	

Carcinogenicity

Product:

Remarks: Not a carcinogen. Based on available data, the classification criteria are not met.

IARC	No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.
OSHA	No component of this product present at levels greater than or equal to 0.1% is on OSHA's list of regulated carcinogens.

Version 1.10	Revision Date: 2023-11-21	SDS Number: 800001028727	Print Date: 2023-11-22 Date of last issue: 08.04.2021 Date of first issue: 26.10.2010

STOT - single exposure

Product:

Remarks: Based on available data, the classification criteria are not met.

STOT - repeated exposure

Product:

Remarks: Based on available data, the classification criteria are not met.

Aspiration toxicity

Product:

Not an aspiration hazard.

Further information

Product:

Remarks: Used oils may contain harmful impurities that have accumulated during use. The concentration of such impurities will depend on use and they may present risks to health and the environment on disposal.

ALL used oil should be handled with caution and skin contact avoided as far as possible.

Remarks: Continuous contact with used engine oils has caused skin cancer in animal tests.

Remarks: Slightly irritating to respiratory system.

SECTION 12. ECOLOGICAL INFORMATION

Basis for assessment	 Ecotoxicological data have not been determined specifically for this product. Information given is based on a knowledge of the components and the ecotoxicology of similar products. Unless indicated otherwise, the data presented is representa- tive of the product as a whole, rather than for individual com-

SECTION 13. DISPOSAL CONSIDERATIONS

Disposal methods	
Waste from residues	 Recover or recycle if possible. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste classification and disposal methods in compliance with applicable regulations. Waste product should not be allowed to contaminate soil or ground water, or be disposed of into the environment. Do not dispose into the environment, in drains or in water

Version 1.10	Revision Date: 2023-11-21	SDS Number: 800001028727	Print Date: 2023-11-22 Date of last issue: 08.04.2021 Date of first issue: 26.10.2010

SECTION 15. REGULATORY INFORMATION

Safety, health and environmental regulations/legislation specific for the substance or mixture

The regulatory information is not intended to be comprehensive. Other regulations may apply to this material.

This product has been classified in accordance with the hazard criteria of the Hazardous Products Regulations (HPR) and the SDS contains all the information required by the HPR.

The components of this product are reported in the following inventories:			
EINECS	: Notified with Restrictions.		
TSCA	: All components listed.		
DSL	: All components listed.
