SECTION 2. HAZARDS IDENTIFICATION

GHS Classification

Not a hazardous substance or mixture.

GHS label elements

Hazard pictograms	: No Hazard Symbol required	
Signal word	: No signal word	
Hazard statements	 PHYSICAL HAZARDS: Not classified as a physical hazard under GHS criteria. HEALTH HAZARDS: Not classified as a health hazard under GHS criteria. ENVIRONMENTAL HAZARDS: Not classified as an environmental hazard under GHS criteria. 	
Precautionary statements	: Prevention: No precautionary phrases.	

Version 1.1 Revision Date: 2016-05-25

Print Date: 2016-05-26 Date of last issue: 15.06.2015 Date of first issue: 15.06.2015

Response:

SDS Number:

800010023184

No precautionary phrases. Storage: No precautionary phrases. Disposal: No precautionary phrases.

Other hazards which do not result in classification

Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis. Used oil may contain harmful impurities. Not classified as flammable but will burn.

SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

Substance name	: Quaker State Defy High Mileage 5W-30 Motor Oil
Chemical nature	 Synthetic base oil and additives. Highly refined mineral oil. The highly refined mineral oil contains <3% (w/w) DMSO- extract, according to IP346.
	* contains one or more of the following CAS-numbers: 64742- 53-6, 64742-54-7, 64742-55-8, 64742-56-9, 64742-65-0, 68037-01-4, 72623-86-0, 72623-87-1, 8042-47-5, 848301-69- 9.

Hazardous components

Chemical name	CAS-No.	Concentration (% w/w)
Polyolefin Amide Alkeneamine Polyol	Not Assigned	1 - 3
Alkaryl amine	Not Assigned	1 - 3
Interchangeable low viscosity base oil (<20,5 cSt @40°C) *	Not Assigned	0 - 90

SECTION 4. FIRST-AID MEASURES

	If persistent irritation occurs, obtain medical attention.
In case of eye contact	: Flush eye with copious quantities of water.
In case of skin contact	 Remove contaminated clothing. Flush exposed area with wa- ter and follow by washing with soap if available. If persistent irritation occurs, obtain medical attention.
If inhaled	: No treatment necessary under normal conditions of use. If symptoms persist, obtain medical advice.
General advice	: Not expected to be a health hazard when used under normal conditions.

Version 1.1	Revision Date: 2016-05-25	SDS Number: 800010023184	Print Date: 2016-05-26 Date of last issue: 15.06.2015 Date of first issue: 15.06.2015	
lf sw	vallowed	•	reatment is necessary unless large quantities however, get medical advice.	
Most important symptoms and effects, both acute and delayed		: Oil acne/folliculitis signs and symptoms may include formation of black pustules and spots on the skin of exposed areas. Ingestion may result in nausea, vomiting and/or diarrhoea.		
Protection of first-aiders		appropriate pe	tering first aid, ensure that you are wearing the rsonal protective equipment according to the and surroundings.	
Note	es to physician	: Treat symptom	natically.	

SECTION 5. FIRE-FIGHTING MEASURES

Suitable extinguishing media	:	Foam, water spray or fog. Dry chemical powder, carbon diox- ide, sand or earth may be used for small fires only.	
Unsuitable extinguishing media	:	Do not use water in a jet.	
Specific hazards during fire- fighting	:	Hazardous combustion products may include: A complex mixture of airborne solid and liquid particulates and gases (smoke). Carbon monoxide may be evolved if incomplete combustion occurs. Unidentified organic and inorganic compounds.	
Specific extinguishing meth- ods	:	Use extinguishing measures that are appropriate to local cir- cumstances and the surrounding environment.	
Special protective equipment for firefighters	:	Proper protective equipment including chemical resistant gloves are to be worn; chemical resistant suit is indicated if large contact with spilled product is expected. Self-Contained Breathing Apparatus must be worn when approaching a fire in a confined space. Select fire fighter's clothing approved to relevant Standards (e.g. Europe: EN469).	

SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protec- tive equipment and emer- gency procedures	:	Avoid contact with skin and eyes.
Environmental precautions	:	Use appropriate containment to avoid environmental contami- nation. Prevent from spreading or entering drains, ditches or rivers by using sand, earth, or other appropriate barriers.

Versior 1.1	Revision Date: 2016-05-25	SDS Number: 800010023184	Print Date: 2016-05-26 Date of last issue: 15.06.2015 Date of first issue: 15.06.2015
		Local authoritie cannot be cont	es should be advised if significant spillages ained.
Methods and materials for containment and cleaning up		Prevent from s or other contain Reclaim liquid Soak up residu	spilt. Avoid accidents, clean up immediately. preading by making a barrier with sand, earth nment material. directly or in an absorbent. ie with an absorbent such as clay, sand or other al and dispose of properly.
Ad	ditional advice	see Chapter 8	on selection of personal protective equipment of this Safety Data Sheet. on disposal of spilled material see Chapter 13 of a Sheet.

SECTION 7. HANDLING AND STORAGE

i-
e e-
e

Version 1.1	Revision Date: 2016-05-25	SDS Number: 800010023184	Print Date: 2016-05-26 Date of last issue: 15.06.2015 Date of first issue: 15.06.2015	
Packaging material			al: For containers or container linings, use mild nsity polyethylene. erial: PVC.	
Container Advice			: Polyethylene containers should not be exposed to high tem- peratures because of possible risk of distortion.	

SECTION 8. EXPOSURE CONTROLS AND PERSONAL PROTECTION

Components with workplace control parameters

Components	CAS-No.	Value type (Form of exposure)	Control parame- ters / Permissible concentration	Basis
Oil mist, mineral	Not Assigned	TWA ((inhal- able frac- tion))	5 mg/m3	US. ACGIH Threshold Limit Values
		TWA (Mist)	5 mg/m3	OSHA Z-1
		TWA (Inhal- able fraction)	5 mg/m3	ACGIH

Biological occupational exposure limits

No biological limit allocated.

Monitoring Methods

Monitoring of the concentration of substances in the breathing zone of workers or in the general workplace may be required to confirm compliance with an OEL and adequacy of exposure controls. For some substances biological monitoring may also be appropriate.

Validated exposure measurement methods should be applied by a competent person and samples analysed by an accredited laboratory.

Examples of sources of recommended exposure measurement methods are given below or contact the supplier. Further national methods may be available.

National Institute of Occupational Safety and Health (NIOSH), USA: Manual of Analytical Methods http://www.cdc.gov/niosh/

Occupational Safety and Health Administration (OSHA), USA: Sampling and Analytical Methods http://www.osha.gov/

Health and Safety Executive (HSE), UK: Methods for the Determination of Hazardous Substances http://www.hse.gov.uk/

Institut für Arbeitsschutz Deutschen Gesetzlichen Unfallversicherung (IFA), Germany http://www.dguv.de/inhalt/index.jsp

L'Institut National de Recherche et de Securité, (INRS), France http://www.inrs.fr/accueil

Engineering measures

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include: Adequate ventilation to control airborne concentrations.

Version 1.1	Revision Date: 2016-05-25	SDS Number: 800010023184	Print Date: 2016-05-26 Date of last issue: 15.06.2015 Date of first issue: 15.06.2015
			is heated, sprayed or mist formed, there is Il for airborne concentrations to be generated.
		controls. Educate and tra measures relev product. Ensure appropr equipment used equipment, loca Drain down sys nance. Retain drain do subsequent rec Always observe washing hands drinking, and/or protective equip	res for safe handling and maintenance of ain workers in the hazards and control ant to normal activities associated with this iate selection, testing and maintenance of d to control exposure, e.g. personal protective al exhaust ventilation. tem prior to equipment break-in or mainte- wns in sealed storage pending disposal or ycle. e good personal hygiene measures, such as after handling the material and before eating, smoking. Routinely wash work clothing and oment to remove contaminants. Discard con- ing and footwear that cannot be cleaned.
	nal protective equips	: No respiratory p conditions of us In accordance w tions should be If engineering of tions to a level select respirato cific conditions Check with resp Where air-filteri priate combinat Select a filter su	protection is ordinarily required under normal ie. with good industrial hygiene practices, precau- taken to avoid breathing of material. ontrols do not maintain airborne concentra- which is adequate to protect worker health, ry protection equipment suitable for the spe- of use and meeting relevant legislation. 	protection narks	gloves approve US: F739) mad suitable chemic gloves Suitabili usage, e.g. frec sistance of glov	ntact with the product may occur the use of d to relevant standards (e.g. Europe: EN374, e from the following materials may provide al protection. PVC, neoprene or nitrile rubber ty and durability of a glove is dependent on juency and duration of contact, chemical re- re material, dexterity. Always seek advice from . Contaminated gloves should be replaced.

Version 1.1	Revision Date: 2016-05-25	SDS Number: 800010023184	Print Date: 2016-05-26 Date of last issue: 15.06.2015 Date of first issue: 15.06.2015	
		Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Appli- cation of a non-perfumed moisturizer is recommended. For continuous contact we recommend gloves with break- through time of more than 240 minutes with preference for > 480 minutes where suitable gloves can be identified. For short-term/splash protection we recommend the same, but recognize that suitable gloves offering this level of protection may not be available and in this case a lower breakthrough time maybe acceptable so long as appropriate maintenance and replacement regimes are followed. Glove thickness is not a good predictor of glove resistance to a chemical as it is dependent on the exact composition of the glove material. Glove thickness should be typically greater than 0.35 mm depending on the glove make and model.		
Eye p	protection		handled such that it could be splashed into eyes, ewear is recommended.	
Skin	and body protection	work clothes.	on is not ordinarily required beyond standard ctice to wear chemical resistant gloves.	
Therr	mal hazards	: Not applicabl	e	
Prote	ective measures		tective equipment (PPE) should meet recom- onal standards. Check with PPE suppliers.	

Environmental exposure controls

General advice	 Take appropriate measures to fulfill the requirements of relevant environmental protection legislation. Avoid contamination of the environment by following advice given in Chapter 6. If necessary, prevent undissolved material from being discharged to waste water. Waste water should be treated in a municipal or industrial waste water treatment plant before discharge to surface water. Local guidelines on emission limits for volatile substances must be observed for the discharge of exhaust air containing vapour.

SECTION 10. STABILITY AND REACTIVITY

Reactivity	: The product does not pose any further reactivity hazards in addition to those listed in the following sub-paragraph.
Chemical stability	: Stable.
Possibility of hazardous reac- tions	: Reacts with strong oxidising agents.
Conditions to avoid	: Extremes of temperature and direct sunlight.
Incompatible materials	: Strong oxidising agents.
Hazardous decomposition products	: Hazardous decomposition products are not expected to form during normal storage.

SECTION 11. TOXICOLOGICAL INFORMATION

Basis for assessment	:	Information given is based on data on the components and
		the toxicology of similar products. Unless indicated otherwise,
		the data presented is representative of the product as a
		whole, rather than for individual component(s).

Information on likely routes of exposure

Skin and eye contact are the primary routes of exposure although exposure may occur following accidental ingestion.

Acute toxicity

<u>Product:</u>	
Acute oral toxicity	: LD50 (rat): > 5,000 mg/kg Remarks: Expected to be of low toxicity:
Acute inhalation toxicity	: Remarks: Not considered to be an inhalation hazard under normal conditions of use.

Version Revision Date: SDS Number: 1.1 2016-05-25 800010023184	Print Date: 2016-05-26 Date of last issue: 15.06.2015 Date of first issue: 15.06.2015
--	---

Acute dermal toxicity : LD50 (Rabbit): > 5,000 mg/kg Remarks: Expected to be of low toxicity:

Skin corrosion/irritation

Product:

Remarks: Expected to be slightly irritating. Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis.

Serious eye damage/eye irritation

Product:

Remarks: Expected to be slightly irritating.

Respiratory or skin sensitisation

Product:

Remarks: Not expected to be a skin sensitiser.

Germ cell mutagenicity

Product:

Genotoxicity in vivo : Remarks: Not considered a mutagenic hazard.

Carcinogenicity

Product:

Remarks: Not expected to be carcinogenic.

Remarks: Product contains mineral oils of types shown to be non-carcinogenic in animal skinpainting studies.

Highly refined mineral oils are not classified as carcinogenic by the International Agency for Research on Cancer (IARC).

Reproductive toxicity

Product:

Effects on fertility

Remarks: Not expected to impair fertility. Not expected to be a developmental toxicant.

STOT - single exposure

Product:

Remarks: Not expected to be a hazard.

SDS Number:

800010023184

Version 1.1 Revision Date: 2016-05-25

Print Date: 2016-05-26 Date of last issue: 15.06.2015 Date of first issue: 15.06.2015

STOT - repeated exposure

Product:

Remarks: Not expected to be a hazard.

Aspiration toxicity

Product:

Not considered an aspiration hazard.

Further information

Product:

Remarks: Used oils may contain harmful impurities that have accumulated during use. The concentration of such impurities will depend on use and they may present risks to health and the environment on disposal.

ALL used oil should be handled with caution and skin contact avoided as far as possible.

Remarks: Continuous contact with used engine oils has caused skin cancer in animal tests.

Remarks: Slightly irritating to respiratory system.

SECTION 12. ECOLOGICAL INFORMATION

Basis for assessment	 Ecotoxicological data have not been determined specifically for this product. Information given is based on a knowledge of the components and the ecotoxicology of similar products. Unless indicated otherwise, the data presented is representa- tive of the product as a whole, rather than for individual com- ponent(s).(LL/EL/IL50 expressed as the nominal amount of product required to prepare aqueous test extract).
Ecotoxicity	
Product: Toxicity to fish (Acute toxici- ty)	: Remarks: Expected to be practically non toxic: LL/EL/IL50 > 100 mg/l
Toxicity to crustacean (Acute toxicity)	: Remarks: Expected to be practically non toxic: LL/EL/IL50 > 100 mg/l
Toxicity to algae/aquatic plants (Acute toxicity)	: Remarks: Expected to be practically non toxic: LL/EL/IL50 > 100 mg/l

SECTION 13. DISPOSAL CONSIDERATIONS

Disposal methods	
Waste from residues	: Waste product should not be allowed to contaminate soil or ground water, or be disposed of into the environment. Waste, spills or used product is dangerous waste.
	Disposal should be in accordance with applicable regional, national, and local laws and regulations. Local regulations may be more stringent than regional or na- tional requirements and must be complied with.
Contaminated packaging	: Dispose in accordance with prevailing regulations, preferably to a recognized collector or contractor. The competence of the collector or contractor should be established beforehand. Disposal should be in accordance with applicable regional, national, and local laws and regulations.

SECTION 14. TRANSPORT INFORMATION

National Regulations

TDG

Not regulated as a dangerous good

International Regulation

IATA-DGR

SECTION 15. REGULATORY INFORMATION

Safety, health and environmental regulations/legislation specific for the substance or mixture

This product has been classified in accordance with the hazard criteria of the Hazardous Products Regulations (HPR) and the SDS contains all the information required by the HPR.

The components of this product are reported in the following inventories:		
EINECS	: All components listed or polymer exempt.	
TSCA	: All components listed.	
DSL	: All components listed.	

SDS Number:

800010023184
