### Safety Data Sheet PNEUMATIC AIR TOOL OIL

# TOPRING

### SDS 3900A

| 1. Identification                                       |  |
|---|--|
| Product identifier                                      | PNEUMATIC AIR TOOL OIL   |
| Product code  | 69.100, 69.101, 69.104   |
| Other means of<br>identification                        | Air Tool Oil, Huile à outils pneumatiques, Grade ISO 32.   |
| Recommended use of the chemical and restrictions on use | Lubricant oil.   |
| Manufacturer  | TOPRINGS LTÉE.<br>1020, boulevard Industriel<br>Granby, Québec J2J 1A4<br>Tél. 800.263.8677<br>450.375.1828<br>Téléc. 450.375.1408<br>http://www.topring.com |
| Emergency phone<br>number                               | Canutec: 613-996-6666<br>Quebec Antipoison Center: 1-800-463-5060  |

| 2. Hazard identification   |  |  |  |  |
|--|--|--|--|--|
| <b>Summary</b> Avoid contact with skin, eyes and clothing. Avoid prolonged or repeated inhalation of mist or vapor. Do not ingest. If ingested consult physician immediately and show this Safety Data Sheet. Wear eye protection, gloves and other protective clothing that are adapted to the task being performed and the risks involved. |  |  |  |  |
| WHMIS 2015/OSHA HCS 2012/GHS   |  |  |  |  |
| Not Regulated under WHMIS 2015/GHS   |  |  |  |  |
| P101: If med   | lical advice is needed, have product container or label at hand. |  |  |  |
| P264: Wash skin thoroughly after handling.   |  |  |  |  |
| P270: Do not eat, drink or smoke when using this product.  |  |  |  |  |
| P271: Use only outdoors or in a well ventilated area   |  |  |  |  |

P271: Use only outdoors or in a well-ventilated area.

P280: Wear eye protection, gloves and other protective clothing that are adapted to the task being performed and the risks involved.

P301+310+331: IF SWALLOWED: Immediately call a POISON CENTER or a physician. Do NOT induce vomiting.

P363: Wash contaminated clothing before reuse.

P305+351+338: IF IN EYES: Rinse continuously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing.

P403: Store in a well-ventilated place.

P501: Dispose of contents and container to an approved waste disposal plant.

| 3. Composition/information on ingredients                 |            |                  |  |
|---|------------|------------------|--|
| Common name   | CAS        | Weight % content |  |
| Distillates (petroleum), solvent-refined heavy paraffinic | 64741-88-4 | %                |  |

| Distillates (petroleum), hydrotreated heavy paraffinic | 64742-54-7 | % |
|--|------------|---|
| Residual oils (petroleum), solvent-refined             | 64742-01-4 | % |

**Note:** The product is made at 99.9% of a mixture of these highly refined ingredients, containing no polycyclic aromatic hydrocarbon (PAH).

| 4. First-aid measures  |  |  |
|------------------------|--|--|
| Inhalation             | Move person to fresh air. If not breathing, give artificial respiration. If a problem develops or persists, seek medical attention.  |  |
| Skin contact           | Wash skin with warm water and mild soap. Remove contaminated clothing and wash before reuse. If a problem develops or persists, seek medical attention. Discard contaminated leather articles such as shoes and belt.  |  |
| Eye contact            | Flush with water for at least 15 minutes. Remove contact lenses. Hold eyelids apart to rinse properly. If a problem develops or persists, seek medical attention.  |  |
| Ingestion              | DO NOT INDUCE VOMITING! If victim is conscious wash out mouth with water. Never give anything by mouth if victim is unconscious or convulsing. If spontaneous vomiting occurs, keep head below hip level to prevent aspiration into the lungs. Seek medical attention or contact a Poison Centre immediately.  |  |
| Other                  | No information available.  |  |
| Symptoms               | No information available.  |  |
| Notes to the physician | Aspiration hazard for the lungs (ingestion/vomiting). Can enter lungs and cause damage. If gastric lavage is performed, suggest endotracheal and/or esophageal control. Danger from lung aspiration must be weighed against toxicity when considering emptying the stomach. Treatment of exposure should be directed at the control of symptoms and the clinical condition of the patient. |  |

| 5. Fire-fighting n                                 | 5. Fire-fighting measures  |  |  |  |
|--|--|--|--|--|
| Suitable extinguishing media                       | carbon dioxide (CO2), dried powder, chemical foam. Do not use a heavy water jet.   |  |  |  |
| Specific hazards<br>arising from the<br>chemical   | Non-Flammable. May be combustible at high temperature.   |  |  |  |
| Special protective equipment                       | Firefighters must wear self contained breathing apparatus with full face mask. Firefighting suit may not be efficient against chemicals.               |  |  |  |
| Special protective<br>actions for<br>fire-fighters | Use water spray to cool fire-exposed containers. Prevent run-off from fire control or dilution from entering streams, sewers or drinking water supply. |  |  |  |

| 6. Accidental rel  | 6. Accidental release measures   |  |  |
|--|--|--|--|
| Personal precautions,<br>protective equipment<br>and emergency<br>procedures | Do not touch spilled material. Make sure to wear personal protective equipment mentioned in this Safety Data Sheet.  |  |  |
| Environmental precautions  | Prevent entry in sewer and other enclosed area. For a large spill, consult the Department of Environment or the relevant authorities.  |  |  |
| Methods and<br>materials for<br>containment and<br>cleaning up               | Ventilate the area well. Remove sources of ignition. Absorb with inert material (soil, sand, vermiculite) and place in an appropriate waste disposal clearly identified. Dispose via a licensed waste disposal contractor. |  |  |

# 7. Handling and storage

| Precautions for safe handling                                      | Use in well ventilated area. Avoid contact with skin, eyes and clothing. Do not breathe vapours, mists or aerosols. Make sure to wear personal protective equipment mentioned in this Safety Data Sheet. Turn off all pilot lights, flames, stoves, heaters, electric motors, welding equipment and other sources of ignition. Avoid contamination with another chemical product. Keep containers tightly closed when not in use. Do not eat, do not drink and do not smoke during use. After use, wash hands with soap and water. Wash contaminated clothing before reuse. |  |
|--|---|--|
| Conditions for safe<br>storage, including any<br>incompatibilities | Store tightly close and in properly labelled container. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Store away from incompatible materials (see section 10). Keep away from direct sunlight and heat.  |  |
| Storage temperature  | 5 to 45°C   |  |

| 8. Exposure controls/personal protection      |  |                                  |                              |  |   |
|---|--|----------------------------------|------------------------------|--|---|
| Immediately<br>Dangerous to Life or<br>Health | No IDLH value is reported.   |                                  |                              |  |   |
|   | drotreated heavy paraffinic<br>lvent-refined heavy paraffinic<br>, solvent-refined   | TWA (8h)<br>TWA (8h)<br>TWA (8h) | Mist<br>Mist<br>Mist<br>Mist | 5 mg/m <sup>3</sup><br>5 mg/m <sup>3</sup><br>5 mg/m <sup>3</sup><br>5 mg/m <sup>3</sup> | ACGIH<br>ACGIH , RSST<br>ACGIH , RSST<br>ACGIH , RSST |
| Appropriate<br>engineering controls           |  |                                  |                              |  |   |
| Individual protection me                      | easures  |                                  |                              |  |   |
| Еуе   | Wear safety glasses. If there is a risk of contact with eyes, wear chemical splash goggles. If respiratory hazards exist, a full face respirator may be required instead.  |                                  |                              |  |   |
| Hands   | Wear nitrile gloves. Before using, user should confirm impermeability. Discard gloves with tears, pinholes, or signs of wear. Gloves must only be worn on clean hands. Wash gloves with water before removing them. After using gloves, hands should be washed and dried thoroughly. Disposable nitrile gloves can also be used, but discard after single use.   |                                  |                              |  |   |
| Skin  | Personal protective equipment for the body should be selected based on the task being performed<br>and the risks involved. Wear normal work clothing covering arms and legs as required by employer<br>code. To clean up a spill, if necessary, wear a synthetic polyethylene coveralls such as the Tychem<br>(DuPont) or equivalent coveralls manufactured to provide protection against liquid chemical.   |                                  |                              |  |   |
| Respiratory                                   | A respirator is not required in a well-ventilated area. Where the conditions in the workplace require a respirator, it is necessary to follow a respiratory protection program. Moreover, respiratory protection equipment (RPE) must be selected, fitted, maintained and inspected in accordance with regulations and standard 29 CFR 1910.134 (OSHA), ANSI Z88.2 or CSA Z 94.11 (Canada) and approved by NIOSH/MSHA. In case of insufficient ventilation or in confined or enclosed space and for an assigned protection factor (APF) up to 10 times of exposure limit, wear a half mask respirator with organic vapour cartridges. For an APF until maximum 100 times of exposure limit, wear a full face mask respirator with organic vapour cartridges. |                                  |                              |  |   |
| Feet  | Wear rubber boots to clean up a spill.   |                                  |                              |  |   |
| Safety glasses Nitrile gloves                 |  |                                  |                              |  |   |

| 9. Physical and chemical properties |  |  |                       |  |
|-------------------------------------|--|--|-----------------------|--|
| Physical state                      | Liquid   | Flammability                             | Non-flammable.        |  |
| Colour                              | Yellowish  | Flammability limits                      | N/Av.                 |  |
| Odour                               | Petroleum odor   | Flash point                              | >190°C                |  |
| Odour threshold                     | 100 ppm  | Auto-ignition<br>temperature             | >350°C                |  |
| рН                                  | N/Ap.  | Sensibility to electrostatic charges     | N.Av.                 |  |
| Melting point                       | -40°C  | Sensibility to sparks and/or friction    | N.Av.                 |  |
| Freezing point                      | -40°C  | Vapour density                           | >5 (Air = 1)          |  |
| Boiling point                       | 150 to 600°C   | Relative density                         | 0.86 kg/L (Water = 1) |  |
| Solubility                          | Insoluble in water.  | Partition coefficient<br>n-octanol/water | 5 to 24               |  |
| Evaporation rate                    | < Butyl Acetate  | Decomposition<br>temperature             | N/Av.                 |  |
| Vapour pressure                     | <0.13kPa (1 mm Hg) @ 25°C  | Viscosity                                | 29 to 35 cSt @ 40°C   |  |
| Percent Volatile                    | N/Av.  | Molecular mass                           | N/Ap.                 |  |
| N/Av.:                              | N/Av.: Not Available N/Ap.: Not Applicable Und.: Undetermined N/E: Not Established |  |                       |  |

| 10. Stability and reactivity                                   |  |  |  |  |
|--|--|--|--|--|
| Reactivity   | No known dangerous reactions.  |  |  |  |
| Chemical stability   | Stable under recommended storage conditions.   |  |  |  |
| Possibility of hazardous reactions (including polymerizations) | Hazardous polymerization will not occur.   |  |  |  |
| Conditions to avoid  | Avoid contact with incompatible materials.   |  |  |  |
| Incompatible materials   | Strong oxidizing agents.   |  |  |  |
| Hazardous decomposition products                               | Under normal conditions of storage and use, hazardous decomposition products should not be produced. |  |  |  |

# 11. Toxicological information

| Numerical<br>measures of<br>toxicity | Distillates (petroleum), hydrotreated heavy paraffinic<br>Distillates (petroleum), solvent-refined heavy paraffinic | Ingestion>15000 mg/kgRatLD50Skin>5000 mg/kgRabbit LD50Ingestion>5000 mg/kgRatLD50Inhalation2.18 mg/l/4hRatLC50Skin>5000 mg/kgRabbit LD50 |
|--------------------------------------|---|--|
|                                      | Residual oils (petroleum), solvent-refined  | Ingestion>5000 mg/kgRatLD50Skin>5000 mg/kgRabbit LD50  |
| Likely routes of exposure            | Skin, eyes, inhalation, ingestion.  |  |

| Delayed,<br>immediate and<br>chronic effects | Eye contact                | May cause slight irritation to eyes. Eye Irritation, Rabbit: tests performed with each ingredient of this mixture gave not irritating to slightly irritating results.   |
|--|----------------------------|---|
|  | Skin contact               | Prolonged and repeated contact may cause skin irritation and/or dermatitis. Skin<br>Irritation, Rabbit : tests performed with each ingredient of this mixture gave not<br>irritating to slightly irritating results. Skin sensitisation, Guinea pig: tests performed<br>with each ingredient of this mixture gave negative results. |
|  | Inhalation                 | Generally speaking, working cleanly and following basic precautionary measures will greatly minimize the potential for harmful exposure to this product under normal use conditions. Excessive inhalation is harmful. Exposure to high concentrations of vapor from heated product may cause headache, dizziness, lungs damage.     |
|  | Ingestion                  | Low degree of acute toxicity. Aspiration hazard for the lungs (ingestion/vomiting). Can enter lungs and cause damage. However, the risk of aspiration hazard into the lungs can be minimal due to the high viscosity of the material.   |
|  | IARC/NTP<br>Classification | No ingredients listed.  |
|  | Carcinogenicity            | The following information has been reported for the aliphatic petroleum distillates with regards to carcinogenicity (IARC, 1987): Untreated and mildly-treated oils are carcinogenic to humans (Group 1), and highly-refined oils are not classified as carcinogenic to humans.   |
|  | Teratogenicity             | This material is not known to cause teratogenic effect.   |
|  | Mutagenicity               | This material is not known to cause mutagenic effect.   |
|  | Reproductive toxicity      | This material is not known to cause effects on reproduction.  |
|  | Immunotoxicity             | No information available for this product.  |
| Interactive<br>effects                       | No information available.  |   |
| Other<br>information                         | No information available.  |   |

| 12. Ecological information |   |  |  |
|----------------------------|---|--|--|
| Ecological<br>toxicity     | Fish, variousLC50SES / NESAquatic Invertebrates, variousEC50SES / NESAquatic Plant - variousEC50SES / NES   |  |  |
| Persistence                | Moderately persistent in the environment.   |  |  |
| Degradability              | Biodegradable (<30% in 28 days). The product is a heavy hydrocarbon mixture in which some ingredients are not readily biodegradable (OECD 301B, IUCLID).  |  |  |
| Bioaccumulative potential  | Log Kow values ranging from about 5 to 25. Bioconcentration Factor (BCF) between 0.9 and 750000 for the mixture. These values indicate a high degree of bioaccumulation.  |  |  |
| Mobility in soil           | Insoluble in water. This mixture is likely to have high Koc values (>5000), indicating a high degree of sorption to the organic matter in soils. This value suggests that some components will display low mobility and some will be essentially immobile in soil. This product pollutes water and contaminates the soil. |  |  |
| Other adverse<br>effects   | Due to the very low solubility of these chemicals in water, the acute toxicity to fish and aquatic invertebrates<br>and the toxicity to aquatic plants are considered to be no effects at saturation (NES). The chronic toxicity to<br>aquatic invertebrates is also considered to be no effects at saturation (NES).     |  |  |

#### 13. Disposal considerations

Important! Prevent waste generation. Use in full. DO NOT dispose residue in sewers, streams or drinking water supply. Non-use oils or waste oils can be reprocessed (recycle) where there is a recovery program. Waste oils should be classified as hazardous mixtures. Dispose via a licensed waste disposal contractor. Observe all federal, state/provincial and municipal regulations. If necessary consult the Department of Environment or the relevant authorities.

| 14. Transport information  |   |  |
|--|---|--|
